COVID-19 and the Schools

Local health departments have the final authority when it comes to an individual's length of quarantine. Regardless if you assume you meet any of the quarantine criteria outlined here, you must adhere to the local health department's guidance.

1. YOU are NOT sick and have NOT been in contact with someone with COVID-19:

Guidelines to be at School:

- Employees and students must self-screen at home prior to heading to school.
- You must wear a face mask unless in your own enclosed office space or permitted by the teacher to remove your face mask. This includes remaining masked at all meetings, regardless if social distance can be maintained.
- You must distance at least 3 feet away from co-workers, visitors and classmates.
- You must wash your hands frequently, sanitize, clean frequently touched item, etc.

2. YOU are NOT sick but someone in your household does not feel well:

Guidelines for Staying Home or Returning to School:

- If the household member does NOT have COVID-19 symptoms (see a list of symptoms below), follow section 1 above.
- If the household member HAS symptoms of COVID-19, follow section 4.

3. YOU were in close and direct contact with someone with COVID-19 who lives outside your household but YOU are NOT sick or showing signs and symptoms:

Guidelines for Unvaccinated Individuals Staying Home or Returning to School:

- Please let your school know which quarantine option you are following.
- Individuals in quarantine should self-monitor for signs and symptoms of illness. If symptoms occur, they should contact their healthcare provider and follow section 4.
- You may work from home during your quarantine.

Daily symptom monitoring continues through quarantine Day 14 and, the individual must strictly adhere to other recommendations such as mask use. They should be advised that if any symptoms develop, they should immediately self-isolate and get tested.

****Vaccinated persons with an exposure to someone with suspected or confirmed COVID-19 are not required to quarantine if they remain asymptomatic after exposure and if their contact is more than 14 days from their final dose of the COVID-19 vaccine. However, they must wear a mask at school and recommended to be tested 3-5 days after exposure.**

In general, people do not need to wear masks when outdoors, though mask use may be considered in outdoor settings that involve sustained close contact with other people who are not fully vaccinated.

Four different ways you may quarantine as long as you have NO symptoms:

1. Quarantine for 14 days; especially if you are going to be around people that are high-risk for the virus: elderly, people with co-morbidities, immunocompromised (recommended);
2. Quarantine for 10 days if you have NO symptoms;
3. Quarantine for 7 days if you have a negative COVID-19 test on or after Day 5 and have NO symptoms;
4. Health department may require you quarantine from athletics for full 14 days.

DIRECT CONTACT:

Defined as anyone who was within 6 feet of an infected COVID-19 person for at least 15 minutes cumulative starting 48 hours before the person began feeling sick.

*EXCEPTION: In the K-12 indoor classroom setting, the direct contact definition excludes students who were at least >3 feet away from an infected student if both students were engaged in consistent and correct use of masks and other K-12 prevention strategies were in place. This exception does not apply to teachers, staff, or other adults in the indoor classroom setting.

**Per local public health department*

COVID-19 SYMPTOMS:

Fever of 100.4 (or higher) or chills; new cough; shortness of breath or difficulty breathing; fatigue; muscle or body aches; headache; new loss of taste or smell; sore throat; congestion or runny nose; nausea or vomiting; or diarrhea.

COVID-19 and the Schools

4. YOU are sick with COVID-19 symptoms but have NOT been tested for COVID-19:

Guidelines for Staying Home or Returning to School:

- Employees and students must self-screen at home prior to heading to school.
- Those who have COVID-19 symptoms (could be only one symptom) should immediately isolate and contact their medical provider or use telehealth for further instructions. Those unvaccinated individuals that reside in the same residence with the individual with the COVID-19 symptom(s) also need to isolate and wait for the directions of the medical provider. Vaccinated individuals that reside in the same residence with the individual with the COVID-19 symptom(s) may return to school if they remain asymptomatic but must wear a mask.
- Individuals with symptoms may return to work or school when symptom-free and fever-free for at least 24 hours (without fever reducing medication) and with a health care provider's clearance. Other unvaccinated individuals in the household may return to school after a healthcare provider has provided an alternative diagnosis (i.e. strep throat, sinus infection, ear infection, etc) for the ill individual. All must have a clearance to return to school.
- If the household member HAS COVID-19, follow section 5.

5. YOU or someone in your household (regardless of vaccination status) are sick and your healthcare provider told you that YOU are POSITIVE for COVID-19 (based on lab test or symptoms):

Guidelines to be at Home:

- Notify the school.
- Those who test positive must provide complete information to the public health department for contact tracing purposes.
- Those who are tested for COVID-19 must stay in constant contact with the COVID-19 testing location so that the public health department can be notified immediately of any positive results so contact tracing can start right away.
- Separate yourself from others in your household, do not share anything (utensils, phone, etc.), and isolate as follows:
 - Those who tested positive but never develop symptoms can end isolation after 10 days since the positive test.
 - Those who tested positive and have moderate to mild symptoms can end isolation after 10 days since the first symptoms appeared; if at least 24 hours have passed without a fever and other symptoms have improved.
 - Those who tested positive and have severe illness may need to continue isolation for a full 20 days.
 - In all cases, the isolation guidance from the local health department should be followed.
- Those unvaccinated individuals that reside in the same residence with the individual who tested positive for COVID-19 need to receive a release from the local health department to return to school.

Guidelines to be at School:

- Those who test positive for COVID-19 must receive clearance from the local public health department. You should bring a copy of your clearance to the school.
- Those returning to school after being released from isolation after having been tested positive for COVID-19 should wear a face mask at all times and should be also be restricted from being around any immunocompromised individuals.
